INDAH & MENARIK

BAGAIMANA CARA MEMECAHKAN
PROBLEM CATUR

ABA SETIAWAN

* KATA PENGANTAR *

Pada permainan catur terdapat sebuah seni catur yang disebut dengan problem catur (CHESS PROBLEM). Dimana problem catur ini telah berkembang sejak abad 18 sampai pada abad sekarang ini. Banyak sekali penggemar dari problem catur ini, untuk itu penulis menyajikan koleksi problem catur pilihan yang indah dan menarik.

Pada buku ini penulis akan membantu cara memecahkan problem catur secara cepat dan tepat, ditunjang pula dengan penjelasan tentang konsep dasar cara pemecahan problem catur.

Selain problem catur disertakan juga beberapa macam permainan akhir. Supaya anda dapat mengetahui bagaimana cara bermain catur pada permainan akhir dengan hasil yang maksimal.

Teriring salam dan doa,
Penulis,

Bandung, Mei 1993

DAFTAR ISI BUKU

BAGAIMANA CARA MEMECAHKAN PROBLEM CATUR ?

KUNCI-KUNCI JAWABAN PROBLEM

HALAMAN 137

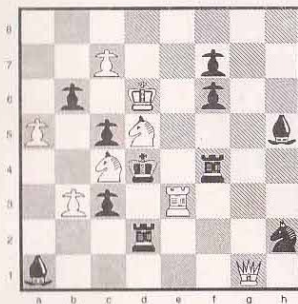

BAGAIMANA CARA MEMECAHKAN PROBLEM CATUR ?

Sebelum anda memecahkan problem catur atau bermain catur, faktor pertama anda harus dapat membaca bentuk bangunan catur. Anda dapat melihat problem catur yang bentuk bangunannya hampir sama tetapi langkah kuncinya sudah jauh berbeda misalnya antara diagram 89-90, 93-94 dan 99-100 dalam buku ini. Umumnya orang memecahkan problem catur ini dengan cara menghitung langkah satu persatu, cara ini justru sulit untuk memecahkan problem catur karena kemungkinan dapat terjawab sangat kecil sekali. Mungkin secara kebetulan anda dapat menemukan langkah kuncinya dengan waktu yang cukup lama. Sebetulnya dalam problem catur ini mudah kalau anda hanya mencari menang, tetapi yang susah adalah mencari ketepatan langkah mat yang telah ditentukan (langkah kunci).

Maka disini anda diuji sampai dimana tingkat kepandaian atau kemahiran dalam mencari langkah kuncinya (CHESS I.Q.).

Penulis akan memberikan sebuah contoh bagaimana cara membaca bentuk bangunan problem catur seperti diagram dibawah ini.

Putih melangkah pertama dan harus mematikan hitam dalam tiga langkah.

Dalam bangunan ini terlihat secara sepintas bahwa ancaman mat untuk hitam akan terjadi setelah benteng putih dipetak e3 digerakan, tetapi bila dilihat dari bentuk bangunan ini, benteng adalah buah tetap yang artinya tidak perlu digerakan. Jika benteng digerakan dibaris 3, maka raja hitam mempunyai kesempatan untuk lari kepetak e4 lalu ke f5 dalam arti mat dalam tiga langkah tidak tercapai. Sebaliknya bila benteng putih digerakan dijalur e, maka raja hitam mempunyai kesempatan untuk sembunyi dipetak c2 melalui petak d3. Dalam posisi ini (lihat diagram), bila putih mempunyai kesempatan untuk skhak, maka matilah raja hitam.

Anda ambil beberapa contoh :

- Bila MxG4 untuk mematikan dipetak c3, digagalkan hitam oleh Bd3, maka tiga langkah mat tidak tercapai. Jadi dalam posisi ini yang dapat dijadikan langkah pemungkas untuk mematikan hitam ialah dengan kuda.
- Bila Kd5 yang dilangkahkan kepetak e7, untuk mematikan di c6 dan f5. Maka petak c6 digagalkan hitam oleh gajah dipetak f3 dan petak f5 digagalkan oleh Bf4.
- Bila Ka3 untuk mematikan di b5 dan c2, maka petak b5 digagalkan hitam oleh gajah dipetak e2 dan petak c2 digagalkan oleh Bd2.

Inilah contoh cara membaca bentuk bangunan problem catur. Lanjutan pemecahan problem catur ini akan dibahas pada problem komposisi dengan langkah tempo pengorbanan dihalaman berikutnya.

Setelah anda dapat membaca bentuk bangunan problem catur, berarti anda sudah mengetahui pokok masalahnya.

Problem catur ini ada dua bagian yaitu :

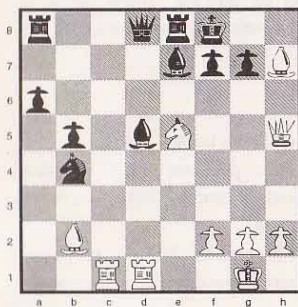

- I. Problem partai
- II. Problem komposisi

Dalam buku ini yang penulis sajikan adalah problem komposisi, tetapi penulis memberikan sebuah contoh problem partai, disertakan juga tentang penjelasan cara pemecahannya.

I. Problem partai

Problem partai terjadi pada kompetisi-kompetisi yang umumnya jumlah buah-buah catur antara putih dan hitam seimbang tetapi kedudukan posisinya terdapat salah satu yang lebih unggul. Dalam problem partai langkah kunci biasanya melakukan skhak untuk menekan posisi lawan dan kebanyakan dari problem ini melakukan kombinasi atau pengorbanan.

Diagram dibawah ini sebuah contoh problem partai yang langkah langkah kuncinya tidak melakukan skhak.

Putih melangkah pertama dan harus mematikan hitam dalam tiga langkah.

Dalam posisi ini ancaman putih untuk mematikan hitam sudah nampak jelas adalah Mxf7 dan Kd7 karena raja hitam sudah tidak dapat lari kepetak manapun. Dalam posisi ini, petak f7 terjaga oleh Gd5 sedangkan petak d7 terjaga oleh Md8, karena masalahnya sudah jelas maka disini kita harus berusaha untuk membuat hitam melepaskan penjagaan terhadap petak-petak d7 dan f7, tentunya dengan suatu pengorbanan. Jadi penyelesaiannya adalah sebagai berikut :

1. BxGd5 MxBd5
Inilah langkah paksaan buat hitam karena bila KxBd5 maka 2. Mxf7+ Mat. Setelah menteri hitam makan Bd5, maka menteri hitam ini mempunyai tugas yang berat yaitu harus menjaga petak d7 dan f7. Disinilah anda akan lebih mudah mencari langkah selanjutnya karena telah mengetahui persoalannya.
2. Mxf7+ MxMf7
Disini menteri hitam terpaksa makan Mf7 dengan melepaskan penjagaan terhadap petak d7.
3. Kd7+ Mat
Terlaksanalah putih mematikan hitam dalam tiga langkah.

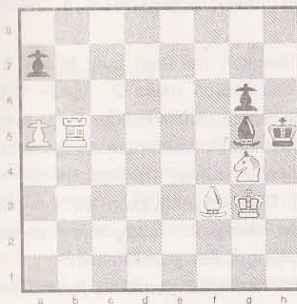

II. Problem komposisi

Problem komposisi tidak pernah terjadi dalam kompetisi karena buah-buah caturnya telah diatur terlebih dahulu oleh seorang penciptanya. Langkah kunci dari problem komposisi jarang melakukan skhak tetapi melakukan langkah tempo atau tempo pengorbanan.

Disini penulis akan menerangkan satu persatu.

a. Problem komposisi dengan langkah tempo .

Umumnya ciri dari problem ini ialah bahwa jumlah buah catur hitam tinggal beberapa buah (sedikit) , misalnya raja + pion , raja + kuda , raja + gajah + pion dan posisi raja hitam dalam keadaan terjepit seperti contoh diagram dibawah ini :

Putih melangkah pertama dan harus mematikan hitam dalam tiga langkah.

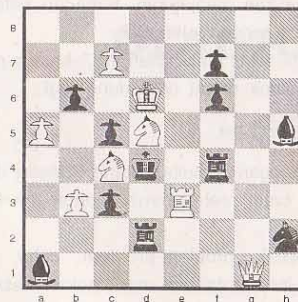

Membaca bentuk bangunan ini cukup sederhana karena disini terlihat posisi raja hitam dan buah yang lainnya tidak dapat digerakan kecuali pion dipetak a7 . Disini kuda putih dapat dibilang buah tetap karena bila kuda digerakan , maka raja hitam akan keluar melalui petak h6 . Dalam posisi ini gajah putih menempati petak putih di f3 dan raja hitam menempati petak putih di h5 . Jadi kesimpulannya anda harus berusaha untuk mengambil salah satu petak diagonal antara e8 dan h4 , petak tersebut adalah untuk penempatan gajah putih supaya mencapai langkah kematian . Tapi disini timbul masalah kedua yaitu hitam masih mempunyai pion dipetak g6 . Bagaimana cara memaksa melangkahkannya ? , Semua ini dapat dilakukan dengan langkah tempo agar kedua maksud

Diatas tercapai yaitu dengan :

1. Gc6 a6 Hitam tidak punya langkah lain .
2. Bf5 Langkah benteng putih ini bermaksud untuk memaksa hitam agar melangkahkan pion dipetak g6 , sehingga langkah mematikan diagonal antara e8 dan h4 dapat dilaksanakan .
gxBf5 Tercapailah sudah .
3. Ge8+ Mat .

b. Problem komposisi dengan langkah tempo pengorbanan .

Ciri dari problem ini ialah bahwa jumlah buah catur hitam cukup banyak , tetapi perwiranya harus menjaga petak-petak yang terancam oleh perwira buah putih . Misalnya pada diagram dibawah ini .

Putih melangkah pertama dan harus mematikan hitam dalam tiga langkah .

Cara membaca bentuk bangunannya telah diterangkan didepan .

Karena anda sudah mengetahui masalah dari problem catur ini , yaitu langkah pemungkasnya dengan kuda . Maka anda harus mengambil salah satu dari empat petak

yang mematikan . Supaya petak c2 dan f5 terlepas dari penjagaan benteng hitam , anda harus mencari titik potong antara d2 dan f4 yaitu f2 . Disini perlu pengorbanan , yang dapat dikorbankan oleh putih kepetak f2 ialah menteri . Jadi anda hanya melangkahkan menteri kepetak f2 dengan ancaman mat makan benteng hitam dipetak f4 .

Anda ambil contoh bila :

- a. 1. Mf2 BdxMf2 Maka putih melangkah Ka3 dengan ancaman Kb5 dan Kc2 mat tidak dapat terjaga , karena bila hitam mencegah dengan Ge2 , secara tidak langsung melepaskan penjagaan terhadap petak C2 yang terjaga oleh Bf2 .
2. Ka3 Ge2
3. Kc2+ Mat
- b. 1. Mf2 BfxMf2 Bila diambil oleh benteng f , maka putih melangkah Ke7 dengan ancaman Kc6 dan Kf5 . Bila dijawab hitam dengan Gf3 , maka secara tidak langsung melepaskan penjagaan terhadap petak f5 yang terjaga oleh Bf2 .
2. Ke7 Gf3
3. Kf5+ Mat
- c. 1. Mf2 Kf3 Putih tetap melangkah Ke7 karena petak c6 tidak dapat dibendung lagi .

Sekianlah keterangan penulis tentang konsep dasar cara memecahkan problem catur , sebelumnya mohon maaf jika ada kekurangan .

Selamat menebak problem-problem catur yang penulis sajikan dalam buku ini , andaikata menemukan kesulitan anda dapat melihat kunci jawabannya .

64. Problem ini unik sebab dipikir bagaimanapun rasanya tak mungkin mati dalam 2 langkah.

Akan tetapi problem ini mat karena hitam sebelumnya melangkah g5, jadi pion h5 boleh memotong g6.

1. hxg6	Rh5	2. Bxh7+	Mat

228 PROBLEM CATUR INDAH DAN MENARIK

Jika anda ingin mengetahui sampai dimana kepandaian atau kemahiran dalam bermain catur (CHEES IQ), anda dapat mencoba dalam memecahkan problem catur. Dalam buku ini penulis menyajikan 228 problem catur pilihan yang indah dan menarik, disertakan juga tentang penjelasan konsep dasar cara memecahkan problem dan cara membaca bentuk bangunan dalam permainan catur.

Setelah anda banyak mempelajari problem catur, maka anda akan mengetahui bagaimana cara membaca bentuk bangunan dalam sebuah permainan catur, sebab ini sangat penting dalam bermain catur dan bukan dengan cara menghitung langkah satu persatu.

Ini adalah buku abadi sebab setiap problem catur tidak mungkin ada jawaban lain selain langkah kuncinya.

Semoga buku ini bermanfaat bagi penggemar catur.
